OBJECTIVES

Aspiring Full Stack Developer with practical experience in Java, Spring Boot, HTML5, CSS3, JavaScript, React.js and MySQL. Built web development projects, including an ML-based Ransomware Defense System and completed a Full Stack Development Internship. Passionate about building secure, user-centric software solutions and contributing to organizational growth.

EDUCATION

Bachelor of Engineering in Computer Science

2022 – 2026

University College of Engineering (Anna University), Kanchipuram.

CGPA – 8.5

HSC – Sri Saraswati Patasala Girls Hr. Sec. School, Kumbakonam

2022

EXPERIENCE

Full Stack Development Intern – Approtech R&D Solutions Pvt Ltd, Tambaram.

June 30th - July 30th 2025

- Enhanced an interactive web-based quiz application using HTML5, CSS, Javascript and core Java, enabling dynamic questions handling, real-time answer validation and automated score tracking.
 - Designed a responsive and user-friendly interface with features like timed quizzes, instant feedback and cross-browser compatibility, improving user engagement and learning experience.
-

PROJECTS

1. R - GUARD – Ransomware Defense System using Heuristic Traps and Behavioural Anomaly Detection

- Problem:** Modern ransomware encrypts files rapidly and traditional antivirus software fails to detect new variants because it depends on malware signatures.
- Implementation:** We monitor real-time file systems events, extract entropy and behavioral features using **LSTM**, **Sliding window approach**, **UA-DES-DBN**, **DBSCAN** and classify them with an ensemble of **Random Forest** and **Gradient Boosting** algorithms.
- Solution:** Our system detects ransomware at an early stage, generates risk-based alerts and helps prevent large-scale file encryption and data loss.

2. EcoFinds - Secondary Usage Product Delivery App(Frontend | Hackathon)

Technologies: React.js, HTML5, CSS3, Javascript, Java, Spring Boot, MySQL, REST API, Git.

- Built a e-commerce platform that allows users to register, authenticate, list, browse and purchase second-hand products using React.js and Spring Boot.
 - Developed RESTful APIs, implemented CRUD operations, integrated MySQL for data management, and designed a responsive user interface for efficient product search and order.
-

TECHNICAL SKILLS

Programming Languages: Python, Java, C, Javascript, HTML5, CSS3, UI Designs, SQL.

Frameworks & Libraries: Spring Boot, Node.js, React.js, Angular.

Databases: MySQL, PostgreSQL, MongoDB (Basic).

Concepts: Object Oriented Programs (oop), RESTful API, Responsive Designs, AI Technologies.

Tools: VS Code, IntelliJ IDEA, Postman, Docker(Basic), Git & Github, Figma, Excel.

CERTIFICATES

- Java Spring Boot – Course completion – **Digisailor**
- One month Full Stack Development (Java) – NoviTech Jan 30th - Mar 7th 2025
- NPTel Online Certification in Programming in Java with 86% July – October 2025
- Received a Certificate of Appreciation for presenting a research paper on Ransomware Detection using heuristic traps and behavioral anomaly detection at the Second International Conference MESMT – 2026.
